

Top products for
top professionals

We are at your disposal

We are a team of enthusiastic specialists – each of us in our own field – in production, final assembly and quality management, in process engineering, production planning, electronics and software development as well as in the engineering of state-of-the-art devices and equipment. In the international sales department we communicate in several languages with our customers around the globe.

«Buy once – use forever»

You determine our future

You expect from us reliability, flawless supply, consultation, optimal cost/performance ratio. To be at your disposal if needed. Help you to simplify your work. That we can realize together application-specific solutions for technical issues.

Test and challenge us! We cannot work miracles but we are able to fulfill our customer's requirements. Thanks to the tasks we are set, you motivate our employees to extend their technical know-how, which continuously improves the quality of our work.

Your success is our success too. There is nothing better for Ghielmetti than customer satisfaction.

«We thank you therefore»

In these domains we are your specialists

Our products guarantee a safe and noise free environment when broadcasting TV/Radio programs as well as for concerts in all different styles of music.

You will find them in main control rooms of radio and TV stations, play-out suits and recording studios.

Ghielmetti develops, designs and manufactures electronics and electronic devices for audio and video systems in Switzerland. Our customers install these products as part of audio, video and data communication systems.

Equipment for signal distribution, control and monitoring is a speciality of Ghielmetti.

We develop, design and produce all the devices in Switzerland for applications in power plants, air surveillance systems, power generation and distribution plants. (The products are in operation from 0 to 250 Volts AC and DC.)

We deliver media technology and electrical control cabinets wired and ready for installation. We can also assist you when putting your system into operation.

Multimedia Communication

Our matrix boards, routers and connecting patch panels assure flexible connections in sophisticated transmission networks. Safe and high quality connections are provided for an optimal performance of your broadcast or production.

Emergency routing systems and channel switchers allow broadcasting around-the-clock in the event of any failure.

Monitoring units and routers help you to control audio and video signals and to test levels and phases. New cable connections have to be measured, tested and checked. Therefore Ghilmetti provides you with the appropriate equipment.

Industrial Automation

Trip matrix boards for generator protection systems connect the trip signals safely to the generator protection systems, regardless if the trip signal is impulse or static. Visual monitoring of signal transmission through group-memory-circuits by LED. Clearly arranged signal interruption circuits allow to switch on or off specific control sections as required. The flexibility of signal distribution is nearly unlimited.

Our signal distributing units switch all types of different electrical signals in almost any variety of ways. AC and DC signals up to 250 Volts and up to 16 Amps can be connected through the reliable matrix boards and signal distributors.

Reliability of our solutions is our trademark
